

Student Assignment: OAuth 2.0 and OpenID Connect (After JWT)

Objective: Understand how OAuth 2.0 extends authentication and authorization systems and how it works with JWT.

Assignment Questions:

1. Explain the difference between authentication and authorization.
2. Why is OAuth 2.0 needed when JWT already exists?
3. Describe the OAuth 2.0 Authorization Code flow with a clear diagram.
4. Explain the following concepts: - Access Token - Refresh Token - Token expiration and renewal
5. Compare OAuth 2.0 and JWT. Explain their relationship and how they work together in modern web applications.

Additional Study Topics: - Session-based authentication vs JWT - JWT security best practices - Secure token storage - XSS and CSRF attacks - Role-Based Access Control (RBAC)

Submission Requirement: Prepare a written report with explanations, examples, and diagrams where applicable.
